

Personal Ubuntu machine setup

Roles

- `common` :
 - Ensures specific folders are present
 - Ensures system is up to date
 - Installs basic dependencies
- `desktopapps` :
 - Ensures my favorite applications are installed
- `devtools` :
 - Ensures VCS, SDKs, runtimes, compilers, IDEs, fonts, shells, etc. are installed and configured

Getting started

! currently uptimized for Ubuntu 20.04 !

- ensure `ansible` is installed
- execute `ansible-playbook -K ubuntusetup.yml` to setup the machine.
